ADVANCEARC 205

200A PFC INVERTER MMA / LIFT TIG WELDER

The ADVANCE Series of MMA (Stick) welders offer the latest IGBT and PFC (Power Factor Correction) technology for smart operators. Increased reliability and performance for harsh and demanding conditions. Equipped with multi-voltage technology, giving you piece of mind when operating on generators or long extension cords.

- IGBT Inverter technology for smooth & stable welding output
- Active PFC technology for increased duty cycle and energy efficiency
- Increased safety with MMA VRD protection mode
- Will operate with wide range of input voltage, including long extension leads
- Industrial IP23 casing with front panel protection resists damage, moisture and corrosion
- Microprocessor control system with superior and dynamic arc characteristics
- Lightweight & compact design for portable applications
- Extreme stress tested in production up to 440V, ensuring rugged reliability
- Adjustable arc force and hot start enable good control and ease of use when MMA welding
- Lift TIG welding operation for precision in aesthetically important welding jobs (torch optional)
- Accurate pre-setting and feedback of welding parameters & output with digital current display meter
- Durable and reliable with high quality & over specified electronic components
- Intelligent protection system with temperature, voltage and current sensors for increased reliability and safety
- Designed to work with generator power supply with protection from power surges
- Multi PCB construction is economical to service and repair compared to single PCB design
- Accessories include 4m MMA lead with heavy duty twist lock electrode holder and 3m earth lead with heavy duty earth clamp.
