SW230 PORTABLE SPOT WELDER

SW230 PORTABLE SPOT WELDER WITH 120MM ARMS

The Strata SW230 Spot Welder offers the latest Microprocessor control system, with Fuzzy Logic technology that simplifies operation & improves weld quality. Easy setup display for materials between 0.6+0.6mm and 2.0+2.0mm, the SW230 will automatically regulate spot welding current & time according to the material thickness.

- Inverter technology for smooth & stable welding output
- Operates on a 10A, 230V, 50-60Hz AC Power Supply
- Easy setup display for material sizes from 0.6+0.6mm, up to 2.0+2.0mm
- Automatically regulates spot welding current & time according to the material thickness
- Lightweight & compact design for portable applications
- Accessories included 120mm Arm Set, Upper & Lower Electrodes, Side Handle and Owners Manual.
- Industrial IP20 casing resists damage from moisture and corrosion
- Microprocessor control system with superior and dynamic arc characteristics
