

Never Lose Power Again! GT Power Dual Function ATS Switch - Your Ultimate Backup Solution

RELIABLE | AUTOMATIC | MANUAL CONTROL

Power outages are no match for the GTATS125. Automatically switch to generator power or take control with manual operation. Perfect for any power failure situation.

GTATS125

Dual Function ATS Switch - 125A 4-Pole

Features & Benefits:

Compatible with GT Power inverter generators for reliable failover power.

Dual Power Inlets:

Ensures continuous power from either mains or generator sources. Provides for both 4 Pole (3 Phase / 400V) and 3 Pole (Single Phase / 230V) requirements in one switch.

Automatic Switching:

Microprocessor Control quickly senses power loss and seamlessly transitions to alternative power source to ensure no disruption.

Auto Start Signal: Provides Two-Wire start signal to generator to start the engine and initiate the alternative power supply.

Manual Transfer Override:

Provides manual control option with a simple selector switch for emergency operation.

Broad Compatibility:

Accommodates 230-400V systems and supports up to 125A load.

Enhanced Safety:

Optional IP66 sealed cabinet offers protection against environmental elements.

NZ Certified:

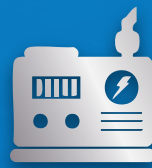

Conforms to IEC / AS / NZS 60947-6-1:2021

Designed for a Wide Range of Applications:

Home and Solar Backup

Retail and Industrial Business Backup

Education and Government Facility Backup

Healthcare and Water Supply/Pump Station Backup
